DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 29 allowed.
2. The following is an examiner's statement of reasons for allowance: With regard to device claims 1 – 15, the prior art of record does not disclose or suggest at least the claim limitations of "a plurality of electrical connecting patterns formed on each of the connecting electrodes, each of the electrical connecting patterns electrically interconnecting each of the thin film transistors to one of the organic electroluminescent diodes; and a plurality of hygroscopic patterns formed on portions of the connecting electrodes." With regard to method claims 16 – 29, the prior art of record does not disclose or suggest at least the claim limitations of "forming a plurality of electrical connecting patterns on each of the connecting electrodes, each of the electrical connecting patterns electrically interconnecting each of the thin film transistors to one of the organic electroluminescent diodes; forming a plurality of hygroscopic patterns on portions of the connecting electrodes."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Park, Ashour et al., Nativi et al., Ishii et al., and Hayashi et al. all disclose a water absorption agent in a luminescent device.
